Ade -B

Guest investigators

Group A

David

Group B

Teri
Guy
Helena
Angela
Janet

Group C

Serena
Matt
Ruth
Ben
Kelly
Will
Rob

Group D

Siobhan
Sian
Darren
Woody

Group E

Alesia
Ian
Donna
Pete

Weather conditions (Outside)

Mild
Wet - boggy in places
Clear sky
Temp dropped to 2° c
Moderate wind 4 Bft
Sunset 16.23
Moonrise 01.26am
Relative Humidity 82%

Equipment used

Dowsing rods
Canum Meter
Negative Ion meter
EMF meter
Dictaphones
Digital/night vision cameras
Pendulums

20.00 - Guests arrive unpack cars, welcome meet.

20.23 - Angela and Darren feel dizzy and sick whilst in the Pony Club room. Angela is very nervous about tonight so need to take things like that into consideration.

20.30 - Helena saw a light on the steps in the North Tunnel

20.45 - Matt felt tightness in his chest whilst in the Saddle Room.

21.00 - West tunnel - bitter cold. Group E capture an orb whilst on Dave's tour at the bottom of the spiral staircase.

21.20 Whilst everyone is together on the tour, many of the group seeing 3 dark figures at the end of the tunnel. At the bottom of the West tunnel Becky turns out all the lights. Angela is very unsure and sits on the steps. She feels like a blowing on her neck and face, jenny feels a sharp pain in her neck.

21.33 Darren reports ice cold shiver (like someone walking over his grave) whilst walking down the tunnel towards the Magazine.

21.50 Groups go their separate ways for vigils.

Down North Tunnel, Team D reports footsteps and horse noises despite horses locked away in the stables. They also report seeing something out in the moat.

22.00 Team A at the spiral staircase report a mist moving away from David who is sat on the bottom step. At the same time Sarah (me) takes a photo and captures an orb above and behind David's head (see website photo)

22.30 Heading to the West tunnel, Group E report seeing a shadow of a man walk through a door way, there was no one else in this area at the time. A photo is taken and reveals what looks like a Victorian lady dressed in blue, stood at the end of the tunnel (see website).

22.50 - Halfway down East Tunnel team D reports a barrier of temperature, really warm then icy cold then warm again.

Further up Darren takes a photo through a doorway and an orb is caught on camera, a solid ball of light- white circle- 3 photos are taken in the same spot.

22.53 Still in the East tunnel Team C reports the Canum meter increasing to 1. It is again icy cold. Woody made his way back up the tunnel and sees a figure but it quickly disappeared, Siobhan also saw a white outline of something behind Darren (unclear where he was standing) but this disappeared when the torch was shone on that area. Team A report a shuffling noise in the corridor on the way down the East tunnel. Team A joins Team C at the bottom of the tunnel and they report seeing a dark figure in the door way, moving away from them.

23.00- Team E reports a shuffling noise coming from the top of the spiral staircase.

23.18 Team A report noises in north Tunnel, no one else around.

23.30 - Team C reports a tapping in the Self Defence Room, a feeling of spiders in the hair is also reported along with tingling/pins and needles in arms and feet. Lizzie, with Team B, reports seeing a man from the waist up whilst upstairs in the North Tunnel. Team E report orbs in the East tunnel.

23.28 Team a back on the spiral staircase with Team E and they all report a noise coming from the top of the spiral staircase, sounded like a sliding noise.

00.15 Groups go their separate ways again.

Team C reports a feeling of being followed down the west tunnel although they are alone.

Team D begin an Ouija Board, during which they briefly make contact with a spirit. Footsteps are heard outside the door at this time. Feelings experienced include heat, dizziness, cold and a feeling of being pushed off the chair. There was also candle movement (possible draft?).

00.30 - Becky reports feeling very heavy chested in the North tunnel and struggles to find breath. David is with Team A and he lights a candle. The group then try to encourage a spirit to blow the candle out.

00.53 - Team D report hearing music, like a trumpet, during Ouija Board with Dave and Jenny.

Sarah, with Team A in the North tunnel, feels someone touch her on the back of the neck. Panic ensues! The candle flickers. Becky sees orbs on the night vision camera. David tries to encourage more activity by singing 'I know a song that will get on your nerves'. This song is repeated over and over again ...much to the rest of the groups horror!!

01.00 Team A go upstairs in the North tunnel and Becky feels her hair being pulled (ever so slightly).

2.30 - Team D ALL report hearing a mans voice, like a groaning, at the far end of the tunnel. They all went up to the end of the tunnel but heard no further noise and confirmed there was no one else present.

03.00 Regroup and despite a goodnights activity we decide to head home.

Maps

Team E did an excellent job of plotting on their maps the places where activity took place and all these have been included in this report.

This can also be used for future reference.

Ouija Board

Again Helena received messages from a family member. Someone also attempted to make contact with Ben but we are very unsure who (it doesn't help that the spirit claimed to know Ben but Ben didn't know them!)

Conclusion

A very active night's investigation. We still have various footage to watch and Dictaphones to listen too. No trigger objects were used on this occasion and no CCTV. We hope to return here in the next few months and will be using additional equipment to confirm our findings. This is a fantastic place and is very easy to get lost in. It is a maze of tunnels and is like a rabbit warren. Research will be done to look closer into the events that took place here. This is a good report to compare to when we investigate again.

Looking forward to it.
